Bluewater Energy Solutions Awarded Startup and Commissioning Services for the Basin Electric Power Cooperative, Deer Creek Station.

Project located in Elkton, SD and Bluewater Energy Solutions will provide Basin Electric startup and commissioning services.

Bluewater Energy Solutions is pleased to announce that it has been awarded a contract to perform startup and commissioning services for Deer Creek Station located in South Dakota.

Construction has begun on the Deer Creek Station, a 300-net megawatt natural gas combined generation facility near Elkton, SD, in Brookings County. The project was approved by Basin Electric's board of directors in October 2007. Major equipment at the plant includes a combustion turbine fueled by natural gas; a heat recovery steam generator; a steam turbine driven by steam created from the heat of the gas turbine's exhaust; and an air-cooled condenser to cool and convert steam to water for re-use.

"Bluewater Energy is excited to work with Basin Electric on this important power project in South Dakota. This major project will provide many jobs to the local area and we look forward to working with Basin Electric and their site team," said Perry Novak, President of Bluewater Energy Solutions.

About Bluewater Energy Solutions

Bluewater Energy is a leading provider of startup and commissioning, plant operations and maintenance support, consulting, industrial cleaning and project management services specializing in gas turbine, coal, biomass and industrial markets. Started in 2003, Bluewater was established by a group of seasoned energy professionals in response to a growing need within the energy industry for a cost effective, safety minded, reliable service group. Our management team is comprised of industry experts who have attained the global experience, knowledge, financial depth and reputation for exceeding our client's expectations. With a wide variety of skill sets and expertise, we can quickly understand your needs and provide innovative solutions.
